

USER INSTRUCTIONS

Java Plug-in for mVisitor System

The MPA's mVisitor application works directly from your computer browser (Internet Explorer, Safari or Firefox).

You will need to disable your Pop-Up Blocker have the latest Java plug-in installed in order to run this application.

You can download and install the latest Java plug in on your browser from:
<http://java.com>

If you have problem installing java plug-in on your browser please contact your system administrator for assistance.

Note: As of September 1, 2015 Google Chrome has discontinued support for the Java Plug-in, we suggest Chrome users to try alternate browsers.
